NISSAN ELECTRIC VEHICLE CONCEPTS

NISSAN HYPER URBAN

- The Nissan Hyper Urban concept was announced at the 2023 Japan Mobility Show
- The car represents future design and technological capabilities of Nissan's electric offerings
- The Nissan Hyper Urban's styling complements the sophisticated tastes of its target users, such as urban and suburban based professionals who prioritise environmental sustainability
- This all-electric crossover concept is designed to remain fresh for every new owner, ensuring an extended lifecycle through regular software and hardware upgrades
- The car is characterised by a sleek and modern aesthetic, making a bold statement while also effectively blending in with their environment
- The vehicle seamlessly integrates into the electric vehicle ecosystem (V2H/B/G), for power sharing

NISSAN HYPER PUNK

- The Nissan Hyper Punk concept was announced at the 2023 Japan Mobility Show
- Positioned as an all-electric compact crossover concept, this innovative car caters to a dynamic audience seeking self-expression through style and creativity
- Pioneering innovations for this concept include a polygonal-shaped exterior with dynamic colour changes, offering owners a canvas for self-expression
- With an advanced Li-Ion battery and full autonomous driving capabilities, this compact crossover concept epitomises the fusion of cutting-edge technology and individuality

NISSAN CHILL-OUT

- The Nissan Chill-Out concept was unveiled in 2021 and previously confirmed as the inspiration for a future EV to be built in Sunderland
- The car is a compact, sporty, daring city EV concept with an influence from the world of virtual gaming
- It features a sleek and modern design, advanced safety technology, and a productive and comfortable interior space
- The Chill-Out utilises the CMF-EV platform, delivering high levels of comfort and an energising driving experience
